

A Long-Range, Over-The-Air Radio Waveform Analyzer

NX-200 Series Remote Receiver Product Sheet

Extend the DiagnostX Coverage of a Radio System

The DiagnostX NX-200 remote receiver is designed to extend the DiagnostX coverage of a radio system at a reduced cost. Many agencies have combined multiple DiagnostX instruments to set up a networked configuration to ensure continuous system-wide coverage. It is now possible to use the smaller, more economical NX-200 remote receiver to achieve the same result.

Up to three (3) NX-200 remote receivers may be networked to a single DX-2002 Series instrument. All the data is forwarded across an IP network back to the DX-2002 and presented in a single consolidated view. The data transfer rate is only 13 KB per transmission sent. Both the DX-2002 and the NX-200 instruments function as receivers on the network.

The DiagnostX MX-3000 Master unit is designed to accommodate the requirements of larger systems, utilizing more robust hardware with higher performance processors. The MX-3000 does not function as a receiver; it receives data from the NX-200 remote receivers and combines the results into a single view in the DiagnostX Viewer (DV) console.

NX-200 Series Specifications

- Available Frequency Bands: VHF (136 - 174); UHF (375 - 430), (450 - 470), (470 - 512); 700, 800, 900 MHz
- Available Protocols: P25T, P25C, DMR, NXDN, EDACS, SmartZone/SmartNet, MDC1200APL
- Encryption: AES-256
- Sensitivity: -117 dBm (10dB s/n)
- Connector Type: SMA Female/Requires SMA Male Connector
- Environment: Temperature: 0 - 40°C (32 - 104°F)/Humidity: 10 - 85% @ 40°C, non-condensing
- Power Requirements: Single AC Universal Power Supply / 100V - 240V, 50Hz - 60 Hz, 1.0 AMP Nominal
- Dimensions: 2.65" H x 17" W x 13.75" D
- Weight: ~16 lbs.
- Hardware: 19" Rack Mount
